Capabilities / Processes

We manufacture quality parts, from one-of-a-kind prototypes to long-term production runs; and we provide in-house design and engineering services for your custom product needs.

Our processes include screen, digital, laser marking, cnc routing and forming. Engraving, etching, along with numerous fabrication options, are all done in-house to meet your unique requirements. Our in-house facilities include:

<u>Equipment type</u>	<u>Quantity</u>
1. Laser marking machine	1 unit
2. Laser engraving machine	3 units
3. Computerized plotter	1 unit
4. Engraving machine	2 units
5. Large format inkjet printer	2 units
6. Laminator	3 units
7. Semi-automation screen printer	2 units
8. Shearing machine	4 units
9. Sheet bender	1 unit
10. Spot welder	1 unit
11. Thermo-former	1 unit
12. Screen exposure unit	1 unit
13. CNC router	1 unit
14. Table saw	2 units
15. Drying rack	5 units
16. Acrylic edge bender	1 unit
17. Edge router	1 unit
18. Paper shearing machine	1 unit
19. Bench Drill	2 units
20. Electronic weighing scale	1 unit
21. Band saw	1 unit
22. Press, manual	5 units
23. UV dryer	1 unit
24. 30 ton hydraulic press	1 unit
25. One-arm squeegee	1 unit
26. Resin dispenser	1 unit
27. Hot stamping machine	1 unit
28. Etching Machine	2 units
29. Gasket press machine	1 unit

Lean Manufacturing techniques have enabled us to reduce many of the costs of manufacturing by eliminating anything that does not add value to the product for our customers.

Lean methods include improving workplace organization, reducing set-up times, smoothing process flows, continuous employee- skill training and more. We sees Lean Manufacturing as a strategy to **improve and thrive, rather than just survive** in today's global marketplace.

We are constantly working to improve our company and our products by means of "Lean" in order to ensure that you, our customers, receive the best quality products and service available, anywhere.
